Desk Bridge Connections

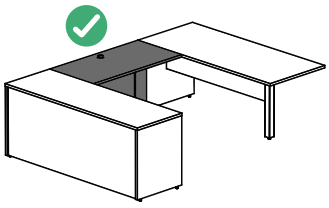

Desk Bridges are connected to other worksurfaces using an inset modesty that extends as a gusset to connect to the gables on the unit it is connected to. Mending plates and stiffeners (if necessary) connect the tops together.

45″L	GEAS45-D	**$95**
57″L	GEAS57-D	**$120**
69″L	GEAS69-D	**$155**

Stiffeners are required when a freespan distance is 60″L or longer.
Freespan is the clearance between two supports that goes directly from the underside of the surface right to the ground. Examples of that support can be a pedestal or gable.

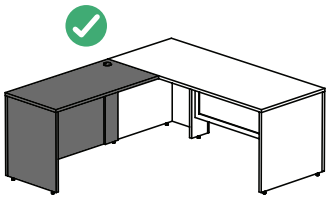

Most Bridge Connections will require a stiffener to be added.

Application Guide

Hutch Connections

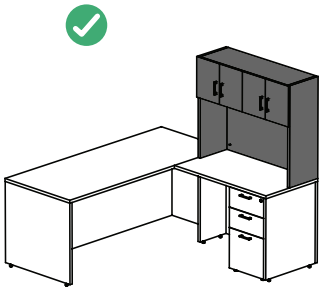

Hutches are either mounted to worksurfaces or directly to a wall. Hutch uprights must be supported below surface by a desk leg or pedestal storage unit.

Addition of pedestal storage is required for freestanding straight desk shell applications, otherwise units are only suitable for use against a wall.
