Case Study
Ducks Unlimited

A leading conservation organization dedicated to protecting wetlands and the wildlife habitats that depend on them across

Project: Corporate Headquarters | Winnipeg, MB
Three H partnered with Ducks Unlimited Canada and Accent Workplace Environments to modernize DUC's Winnipeg headquarters into a bright, welcoming, and highly functional workplace. The redesign balanced modern design with natural warmth, reflecting the organization's mission and 360-degree views of the surrounding wetlands.

Project Highlights
The project included private offices, open workstations, storage, and locker solutions. Warm, natural-look laminate finishes helped connect the interior to the surrounding landscape, while glass panels provided privacy without blocking views of the marsh. The result is an open, welcoming environment that supports both focused work and collaboration.

Three H Partnership
Working closely with Accent Workplace Environments, Three H provided tailored design support and efficient project execution. The project was especially meaningful to our team because of our Northern Ontario roots and Ducks Unlimited's conservation work in our region. We were proud to support an organization whose work makes a meaningful impact in our region.
